

Dear Subscribers,

We are delighted to share with you the final edition of the SAFE-CITIES newsletter! *After more than two and a half years of inspiring work, collaboration and innovation, the SAFE-CITIES project has officially come to a successful conclusion.*

Over the past year, we've made remarkable progress on all fronts.

*We finalised and validated the full **SAFE-CITIES platform** – an innovative suite of tools for security and vulnerability assessment, simulation, training, and planning. The platform was successfully demonstrated in real-world conditions during the **GO!2025 cross-border celebrations in Nova Gorica and Gorizia**, where it showcased its capacity to strengthen preparedness, support training, and coordinate responses for public space security.*

*We also developed a **comprehensive set of training modules**, available both online and in person. Through workshops, hackathons, and pilot activities, we engaged security practitioners, local authorities, and citizens across Europe. The **positive feedback** from end users, experts, and stakeholders has further confirmed the relevance and value of our work.*

*As the project nears completion, we are proud to leave behind a lasting legacy of tools, methodologies, and partnerships that will continue to promote **urban security and resilience** across Europe. But although the project phase is concluding, our journey is far from over – we are actively exploring ways to bring the results to market and sustain the SAFE-CITIES impact.*

Thank you for being part of this journey.

Stay tuned, stay safe – and let's continue working together to make cities safer, more inclusive, and more secure for everyone.

*Warm regards,
Umberto Battista,
SAFE-CITIES Project Coordinator*

 Funded by
the European Union

This is what we've achieved together!

Thanks to the joint efforts of all project partners, we've developed practical tools and insights to help cities stay open, safe, and resilient.

Read and watch the summary of the key takeaways from the journey.
